Brief narrative or bulleted summary of 2014 land information activities, including relevant web-links:

Green Lake County's land records modernization continues to move forward. The funds from County retained fees has allowed in-house work by the GIS Specialist to continue digital parcel mapping. The parcel mapping was completed for all entities in November of 2014. The parcel mapping is now in an ongoing maintenance mode.

The WLIP Grant funds were used in 2014 to re-establish Public Land Survey System (PLSS) corners that have been unidentified for many decades. These PLSS corners provide the foundation for accurate digital parcel mapping.

Grant funds were also used for a project in the Register of Deeds Office for back scanning and indexing of older documents. The outcome of this project is the availability of these documents to the public through the County's website. The redaction of social security numbers was also a component of this project.

Website development and maintenance is an on-going process. Changes to the website data is based on an analysis and consideration of requests made to the Land Information Office.

Education and Training Grant funds continue to be used for a variety of opportunities that benefit Green Lake County's effort to modernize land records and make them available to public and private entities.
