Central Wisconsin Health Partnership

Adams, Green Lake, Juneau, Marquette, Waupaca, Waushara counties

Community Health Improvement Plan 2017-2022

Annual Report - 2018

Priority Area: Health Equity

- Secured 4 years of grant funding provided by the UW Madison School of Medicine and Public Health from the Wisconsin Partnership Program and hired a grant coordinator
- Scheduled 1:1 community conversation training to take place in 2019
- Started educating Public Health staff and community organizations on health equity
- 7 CWHP members attended the Wisconsin Healthiest State Summit
- Created Health Equity as a New priority area in CHIP

What's Coming in 2019:

Priority Area: Chronic Disease

- "Move Your Way"

Social Marketing Campaign

Priority Area: Alcohol and Other Drug Abuse

- Narcan Trainings

Priority Area: Mental Health

- Honest, Open, Proud (mental health stigma reduction)
- Question. Persuade. Refer. (QPR - suicide prevention)

New Priority Area: Health Equity

- Capacity Building
- 1:1 Community Conversation Training

Green Lake County Health Department

2018 COMMUNITY HEALTH IMPROVEMENT PLAN ANNUAL REPORT

ALCOHOL AND OTHER DRUGS PRIORITY AREA

- Grant funding received through Alliance for Wisconsin Youth to Fight Opioid Epidemic.
- Lock boxes distributed at various community events.
- Drug deactivation kits distributed to home bound residents through Meals on Wheels.
- Community Awareness event about opioids held at Berlin High School.
- Alcohol Management Toolkit created to help reduce binge and underage drinking at community events.
- Over 30 individuals trained on Narcan administration in two training sessions hosted by the Health Department.

MENTAL HEALTH PRIORITY AREA

- In partnership from the Aging and Disability Resource Center and local schools, the Health Department participated in the national #BeThe1To campaign to prevent suicide deaths.
- Worked with Thedacare Community Health Action Team to develop a mentoring program at the Boys and Girls Club.
- Conducted 32 health education sessions on a variety of health topics for Behavioral Health Clients living with mental illness or substance use disorders.

Why Residents Feel Locking Up Medication is Important

CHRONIC DISEASE PRIORITY AREA

- Partnered with Aging and Disability Resource Center to host a 6-week Living Well with Chronic Conditions Class.
- Two Strong Women Classes were hosted in Partnership with a local business.
- Two childcare centers were re-certified as being Breastfeeding Friendly.
- Worked with Princeton School District to become Breastfeeding Friendly. A \$250 mini grant was awarded to the school to improve their lactation space.
- Wrote for and received a \$3,000 grant to improve health education in Princeton School District.

Self Reported Outcomes from Strong Women Program

1,184

People reached through a Social Marketing Campaign aimed at preventing suicide.

30

Women who attended two different Strong Women Classes, a strength training class for older adults.

208

Number of prescription lock boxes given out to help prevent misuse of Opioids in Green Lake County.

Key Messages on Nitrate and Bacteria for Green Lake County

DRAFT: January 2, 2019

Key Messages	Supporting Information:
<p>High levels of nitrate can cause health problems in infants, pregnant women, and the general public.</p>	<p>Well owners should test for nitrate at least once a year and before it will be used by a pregnant woman or infant.</p>
	<p>Nitrate can cause blue baby syndrome in infants and may cause birth defects in pregnant women. Nitrate may also cause thyroid problems and other health problems in the general public.</p>
	<p>If nitrate levels are above 10 mg/L:</p> <ul style="list-style-type: none"> • Babies and pregnant women should immediately stop using the water for drinking and preparing foods that use a lot of water (example: infant formula, soup, rice). • Everyone should avoid long-term use of the water for drinking and preparing foods that use a lot of water (example: soup, rice).
	<p>To learn what to do if your well has high nitrate, see this factsheet: https://www.dhs.wisconsin.gov/library/p-02128.htm</p>
<p>Bacteria can cause health problems in everyone.</p>	<p>Well owners should test for bacteria at least once a year and if they notice a change in the color, taste, or smell of the water.</p>
	<p>Bacteria in the well can cause flu-like illnesses, leading to diarrhea, nausea, vomiting, cramps, or fever. Young children, the elderly, and people with weakened immune systems are more likely to be impacted than others.</p>
	<p>If bacteria are present in the well, everyone should immediately stop using the water for drinking and preparing foods.</p>
	<p>To learn what to do if your well has bacteria, see this factsheet: https://www.dhs.wisconsin.gov/library/p-02132.htm</p>

Questions for the community leaders

- Have people with bacteria taken follow-up actions (disinfection, confirmation sampling)?
 - If yes, has this follow-up worked?
- Have people with high nitrate installed treatment devices?
 - If yes, have samples been taken to confirm the treatment is working?
- Are people in the community concerned about their water quality?
- Did any individuals receive grants/loans to install the wells?
