

Behavioral Health Unit—January 2020

Outpatient Mental Health & Substance Abuse Programs- *The majority of Behavioral Health clients are served via our outpatient clinic. The outpatient clinic serves clients' mental health and substance use disorder (AODA) needs.*

January 2020 Note: In general, clinic encounters continue to rise over the past several years.. **The clinic has seen an increase in referrals as well as a decrease in failed (canceled/ no show) appointments— we believe that this is the result of a number of factors including an increased awareness of mental health within the community. Additionally, we believe that clinic efforts such as efforts to offer evidence-based therapies, school-based therapy services, and nursing visits have resulted in enhanced quality of care and better client retention. Given that there are few private sector providers in close geographic proximity, the clinic often faces lengthy waitlists for both intakes and ongoing appointments. Seasonal factors have historically played a role as well with winter-months seeing a higher cancellation rate than usual due to weather/ travel conditions. This month's data also reflect the impact of having one full-time therapist out of the office on an extended medical leave.**

Crisis Services- *Crisis services are available 24/7 including weekends/ holidays for psychiatric and substance use disorder emergencies.* In 2019, our crisis call received an average of 26 new calls per month (this is not including contacts by ongoing clients seeking after-hours support). This month, the line received 25 calls. Although call volume remains relatively consistent, our rate of hospitalization has gradually decreased over the past 3-5 years. Crisis calls do tend to display seasonal influxes that remain relatively consistent year-to-year.

Wrap-Around Services- Behavioral Health Unit provides three tiers of wrap-around services, allowing us to match individuals with a program that meets the level of need based on their unique situation.

1. **Targeted Case Management (TCM)**— Less intensive case management for clients with lower level of need or used as a step-down support out of more intensive program. **This program expanded to include adult clients in summer 2018. It presently serves 6 individuals.**
2. **Comprehensive Community Support Program (CCS)**—Recovery-focused support for clients who may benefit from an intensive level of services for a shorter period of time. **This program serves individuals across the lifespan and presently serves 47 individuals. The program has grown drastically since 2016, and tends to hover around 30-35 individuals at any one time. The program has recently explored options to enhance services to those with substance use-related needs.**
3. **Community Support Program (CSP)**- Intensive community-based support for individuals with chronic mental illness. This support is intended to be long-term and to support clients to maintain psychiatric stability in the community and to reduce repeat hospitalizations. **This program presently serves 10 adults.**

Treatment Court- Treatment Court is an evidence-based alternative-to-incarceration program that combines high levels of accountability and community-based supervision with intensive substance use treatment. The program accepted its first participant in November 2017 and is designed to take 14-18 months to complete. **In January 2020, the program has 7 active participants. The program anticipates a participant graduation (participant M.J.) to be held in the courthouse on 2/21/2020 at 9:00am. Members of the board and interested members of the public are welcome to attend. Further information to be distributed by Treatment Court Coordinator.**

Children’s Long Term Support Waiver (CLTS)—Medicaid waiver program provides funding for families of children with long-term disabilities (developmental, physical, and/or severe emotional disturbance) to access services such as respite care and service coordination which are otherwise not covered by Medicaid insurance. **In 2018, Wisconsin announced the dissolution of the waitlist which required Green Lake County to increase program capacity from 8 children to 16 and to continue to expand as new referrals come in. Since 2018, the program has grown from 8 participants and currently serves 26 youth and continues to accept new referrals. Two additional staff have begun cross-training in CLTS services in order to meet the demand for this service.**

Residential Clients- In January 2020, 1 Behavioral Health clients remains placed in Community-based residential facility (CBRF) level-of-care placement. Additionally, one youth remained in the Northern Center, a short-term residential rehabilitation (serving as a step-down from Winnebago Mental Health Institute). This youth was temporarily discharged and then returned to the facility with a new discharge date in mid-February. One youth has been inpatient at WMHI since 10/15/19. This youth continues to have a case management team actively involved to support discharge planning. Two treatment court participants are presently receiving short-term residential care supported by the treatment court grant.

January 2020 Monthly, Report to the Health & Human Services Board

- **Communicable Diseases**—we continue to monitor pertussis/whooping cough in our county. We had one new case in January, but there were many individuals who were tested due to persistent coughs. We have also had to investigate 3 cases of chlamydia, 2 cases of E. Coli, 1 case of Streptococcus Pneumonia, two cases of Hepatitis C, 5 cases of hospitalized influenza cases, including one death, one case of gonorrhea, and one case of Salmonellosis. Rachel also is a member of the Infection Control Committee at Theda Care Berlin and attended that meeting in January to share community concerns.
- **Water Issues**—I was informed that the City of Berlin shut off their water fluoridation pumps on December 23rd. The Water Commission who is the oversight committee and the mayor were not informed. It is of concern as it helps to reduce cavities in children and improves overall oral health in the community. I attended the Water Commission meeting along with some state dental experts and the committee decided to table the issue until they get more information. I received several calls from upset community members and have encouraged them to speak to their Water Commission members. The Water Task Force, who is coordinating testing for the nitrate grant plans to distribute kits on March 2nd. It is a very ambitious group who is very interesting in improving water quality in our county.
- **Preparedness**—the biggest issues are influenza and Novel Coronavirus. We are monitoring these situations closely and keeping our healthcare partners up to date on any new developments. Rachel, Julia and Allison attended the annual Public Health Preparedness conference in Stevens Point.
- **Community Contacts**—staff made contact with 630 individuals in November. This included immunizations, WIC visits, and a variety of community education sessions on topics such as car seat installation, health and nutrition, brain health and more.
- **Suicide Prevention**—as part of our Prevention and Maternal Child Health Grant objectives, we are working on a suicide prevention education program being led by Rachel Prellwitz. Rachel has completed training to be a QPR trainer. QPR stands for Question, Persuade and Refer. This curriculum can be shared with teachers, students, faith-based groups or any community leader. It educates people on how to question friends or family members who may be depressed or contemplating suicide. It is an evidence-based program that I feel will be very helpful in reducing suicides in our county.
- **DAAT**—The Health Unit staff worked with the Sheriff's Department as they completed their Defense and Arrest Tactic (DAAT) training. We monitor blood pressure, do some health education and do TB screenings. This year we shared a self-monitoring blood pressure cuff with that department so they can keep it in their patrol room and test their blood pressures whenever they like.
- **Tobacco Education**—Julia McCarroll is working with the school liaison officer in Berlin and teaching a program called, "Catch My Breath". It is a program helps to discourage kids from using any type of smoking product including E-cigarettes. The usage is increasing in teens.

Respectfully Submitted,
Kathryn S. Munsey, RN
Green Lake County Health Officer

Environmental Health
Green Lake County
January 2020

Animal Bites/Exposures: Investigations – 3 (2 dog/human, 1 raccoon/human)
Reported Animal Bites/Scratches – 3
Animal Quarantines for Animal v. Human Exposures – 1
Animal Quarantines for Animal v. Animal Exposures – 0
Quarantine Violations and Enforcement Actions Taken – 0
Animals Exhibiting Positive Signs of Rabies During Quarantine – 0
Animals Exhibiting Negative Signs of Rabies During Quarantine – 1
Enforcement Taken for Violations of Vaccination Requirements - 0
Animals Sacrificed for Exhibiting Symptoms of Rabies or Being Rabies Suspects- 2 (1 dog, 1 raccoon. Both negative)

Well Water: 5 test kits distributed.

Lead: A courtesy lead visit was conducted on 01.13.2020. This visit was done in response to a child having an elevated blood lead level; however, the level was not elevated enough to begin an investigation. K. Schneider, PHN, provided educational material on lead poisoning and I utilized test swabs to check for areas of the home that may contain lead dust and paint. A follow-up letter was sent to the family on 01.14.2020. K. Schneider will continue to monitor the lead levels of the child.

Sewage: None.

Solid Waste: None.

Radon: 72 kits distributed

January was Radon Action Month. Informative grocery bag stuffers with a reduced-cost kit coupon were distributed at Crossroad's Market in Green Lake and Piggly Wiggly in Princeton. An informative email was sent to all county employees at the beginning of the month providing information on radon testing and urging county residents to pick up a reduced-cost test kit from the Health Department. Social media was used to bring awareness to the importance of radon testing and radio ads were announced on local radio stations.

Housing: Received a complaint regarding a property in Marquette on 01.13.2020. Upon investigating the complaint, it was discovered that Land Use and Zoning is already working on cleanup with the property owner. Land Use and Zoning will reach out to me if they feel I can assist in the case.

Land Use & Zoning received a complaint regarding an uninhabitable trailer and shed in Markesan and asked if I would conduct a joint inspection with them. K.Kamke (Zoning), S.Leahy (building inspector), and I will be conducting an inspection of the property within the next month.

Received a referral from the Markesan Police Department regarding the conditions of a home in Markesan. On 01.24.2020 an investigation of the home was conducted, a placard was affixed to the house, and abatement orders were issued. Ongoing.

Vector: None.

Asbestos: None.

Food/Water Illness: None.

Abandoned Bldgs: None.

Other: None.

Agent: 12 inspections completed.

A Cease and Desist Order was issued to a Berlin business on 01.07.2020. This order was required as the business was selling food without a license. I am currently working with the business owner to get the facility licensed.

A Cease and Desist order was issued to a Princeton resident on 01.07.2020. The order was required as the resident has been selling meat from their farm without a license.

Participated in the Waushara County 140 Review Meeting on 01.06.2020.

Participated in the Green Lake County Health Equity Assessment on 01.07.2020.

Completed XRF gun training through Wisconsin Department of Health Services on 01.10.2020. This training is required to be certified as a Lead Risk Assessor.

The monthly EH meeting was held on 01.15.2020.

Completed DATCP Advanced HACCP training on 01.16.2020-01.17.2020.

Attended the Health Emergency Preparedness Conference in Stevens Point on 01.22.2020-01.23.2020.

Conducted a lead clearance inspection in Clintonville on 01.31.2020.

A letter explaining the difference between service animals and emotional support animals was delivered to Green Lake County retail food establishments this month. This letter comes in response to a complaint regarding a retail food establishment allowing emotional support animals into their stores.
