LAND USE PLANNING AND ZONING COMMITTEE STAFF REPORT

PUBLIC HEARING June 3, 2021

ITEM I: ZONING CHANGE

OWNER: APPLICANT:

Verla J. Schulz San

REQUEST: The applicant is requesting a zoning change from A-1, Farmland Preservation District to R-4, Rural Residential District, +3.0 acres.

PARCEL NUMBER / LOCATION: The affected parcel number is 012-00694-0500, located in the NW¼ of Section 36, T14N, R12E, Town of Manchester. The site proposed for zoning change is located at N363 Schulz Road.

EXISTING ZONING AND USES OF ADJACENT AREA: The current zoning of the subject parcel is A-1, Farmland Preservation District. It is located west of State Road 73 near Lake Maria. The lands surrounding this parcel are all zoned as A-1 and are used agriculturally. The property falls within jurisdiction of the Shoreland Zoning Ordinance.

<u>ADDITIONAL INFORMATION / ANALYSIS</u>: Currently the parcel is being used as a residential property with a small horse pasture to the east of the house and the remaining vast majority being wooded. The newly proposed +3.0 acre parcel would contain the existing house and the woods southwest of the creek.

The **Soil Survey of Green Lake County** has grouped soil types based on their ability to grow crops, and takes into account the damage that could result when these soils are used. There are eight capability classes that indicate the soil's limitations.

There are three main types of soils on the property. The first type of soil is Plano silt loam (PnA), 0 to 2 percent slopes and occupies ±0.4 acres. This **Type 1** soil is nearly level with slow runoff and has few limitations. This soil is suitable for all the farm and vegetable crops commonly grown in the county. It can be cropped intensively if properly managed. The second type is Ossian silt loam (Os), nearly level and occupies ±1.4 acres of the proposed property. This **Type 2** soil has slow runoff and is likely to have water ponded during wet seasons or after heavy rain. Where properly managed, this soil is suitable for certain vegetable crops. Where drained, acreage is used for most of the farm crops commonly grown in the county. Undrained areas are used for wetland wildlife habitat or unimproved pasture. The third type is Griswold silt loam (GrC2), 6 to 12 percent slopes and occupies ±1.2 acres of the proposed property. This **Type 3** soil has medium runoff and the hazard for erosion is moderate. With proper management, this soil is suited to all the farm crops commonly grown in the county.

<u>STATUTORY CRITERIA PER 91.48(1)</u>: Land may be rezoned out of a farmland preservation zoning district if all of the following are found after public hearing: (Staff comments in bold)

- a) The land is better suited for a use not allowed in the farmland preservation zoning district. More than 87% of the lands that are subject to this rezone request are either erodible soils that are sloped to an adjacent stream or are not capable of being used agriculturally as they are next to a stream. The remaining PnA (Type 1) soils, that are occupied by the owner's dwelling, driveway and front yard, are also isolated from any other aglands. These +3 acres appear to be better suited to non-agricultural uses.
- b) The rezoning is consistent with any applicable comprehensive plan. The proposed rezone is consistent with the county's comprehensive plan as it upholds the goals and objectives, most prominently the goal to preserve the rural characteristic of the county. Section 350-41 of the County Zoning Ordinance states that the R-4 district is intended to provide for limited rural residential use development, require a large residential land area to maintain the rural character, and to accommodate uses that are not urban in nature.
- c) The rezoning is substantially consistent with the county certified farmland preservation plan. The overall goal of the county certified Farmland Preservation Plan is to maintain the integrity and viability of county agriculture...without damaging the economic and social environment or the natural resources..." There are no impacts to the integrity and viability to county agriculture through this rezone. Therefore the rezone request is substantially consistent with the County's certified Farmland Preservation Plan.
- d) The rezoning will not substantially impair or limit current or future agricultural use of the surrounding parcels of land that are zoned for or are legally restricted to agricultural use. The R-4, Rural Residential District is intended to provide for limited rural residential use development, but also require a larger area to maintain the rural character and to accommodate uses like light agriculture. The R-4 district is intended not to impair or limit future agricultural use of surrounding parcels.

TOWN OF MANCHESTER: The Town did not object to and approved of the rezone request.
