Brief narrative or bulleted summary of 2023 land information activities:

Green Lake County's land records modernization continues to move forward. The funds from County retained fees has allowed in-house work by the GIS Specialist to continue digital parcel mapping. The parcel mapping is now in an ongoing maintenance mode including integration of re-established PLSS (Public Land Survey System) corners.

The WLIP Grant funds were used to re-establish PLSS corners that have been unidentified for many decades. These PLSS corners provide the foundation for accurate digital parcel mapping.

Map book, tax roll, and proceedings documents were scanned into digital image format to provide access to information related to individual parcels.

Address map data was optimized for Next Generation emergency 911 implementation.

Survey GPS and camera field mapping equipment hardware and software was maintained.

Website development and maintenance is an on-going process. A hub format is being used to improve user ease of access to Land Records applications.

Education and Training Grant funds continue to be used for a variety of opportunities that benefit Green Lake County's effort to modernize land records and make them available to public and private entities.
