**Discussion – Bank Stabilization Project (Schrock Land):** Zietlow stated that site is too wet and cannot get stone in for repair, thought that banks could be sloped 2:1 for now. Foust recommended waiting until can access site and then do the repair work. Crops can be kept away from ditch top to gain access to site. Board agreed to have excavator clean and shape side slopes this spring and leave a buffer for access. Project was approved at previous meeting, August 2, 2023 meeting.

**Discussion/Action on requests to clean section of Seneca-Warren District Drain:** Zietlow and Morris did inspection of ditch on March 17, 2025 to take bottom elevation of Seneca-Warren ditch from station 335+12 (Nigbor culvert) to station 444+88 (Hwy EE). Bottom is around 1 foot high and in need of maintenance dredging.
