# 2024 fuel reconciliation update

The Public Service Commission of Wisconsin (PSC) requires utilities to file an annual fuel cost plan forecast. The PSC reviews and uses this plan to establish the utility company's rates for the following calendar year. The PSC also reviews actual monitored fuel costs annually for over- or under-collection by each utility.

At Alliant Energy, actual fuel costs in 2024 were higher than forecast. Therefore, on March 19, 2025, we filed an application with the PSC to reconcile the under-collection. In our filing, we request a fuel adjustment of \$0.002942/kWh be applied to customer bills from October 1 to December 31, 2025. If approved, the average residential customer bill will increase approximately \$2 per month for the final three months of 2025. Average commercial and industrial customer bills will increase approximately 2-3 percent over that period.

As part of its review process, the PSC will schedule technical and public hearings in Madison, Wisconsin. To obtain more information about the hearing schedule or regulatory process, visit [psc.wi.gov](http://psc.wi.gov) and search docket number 6680-FR-2024. If you have questions about our rates, visit [alliantenergy.com/wisconsinrates](http://alliantenergy.com/wisconsinrates) or call 1-800-ALLIANT (1-800-255-4268).

Guided by our purpose-driven strategy to serve customers and build stronger communities, we continue to take bold, thoughtful actions to deliver value to customers and mitigate long-term costs. We continue making investments to modernize the energy grid by focusing on building a strong and reliable energy portfolio. Our approach integrates renewables and optimizes traditional energy sources. We are balancing innovation with proven solutions to meet rising energy demands and pave the way for a more reliable, safe, sustainable and cost-effective energy future for all customers.

Note: In Wisconsin, fuel costs are a pass-through, which means utilities like our company do not profit.
